LAB ASSISTANT

DEPARTMENT OF OTORHINOLARINGOLOGY

The department was founded in 1926; the heads of the department were professors: Nikoloz Aspisov, who headed it until 1952, Archil Chargeishvili (1952-1971), Tamaz Tokhadze (1971-1993), Revaz Khechinashvili (1993-1999), Shota Japaridze (2006-2015), Mikheil Jashi (2015-2021), and Nato Nakudashvili till present.

The Department of Otorhinolaryngology has developed undergraduate and residency programs. Currently, the department continues practical and scientific research in the following areas: Using methods of functional endoscopic nose surgery, the use of a diode laser in otorhinolaryngology, modern methods of implantation, and new methods of auditory function.
