

THE DEPARTMENT OF ULTRASONOGRAPHY

PROFESSOR GIORGI SVANIDZE
HEAD OF DEPARTMENT

MARINA ALFAIDZE
ASSISTANT PROFESSOR

THE DEPARTMENT OF ULTRASONOGRAPHY

The Department of Ultrasonography was established in 1920 as a part of the department of Radiology. The department is directed by Professor Giorgi Svanidze. For years the department has been studying issues related to diagnostic imaging of the hepatobiliary system.

Nowadays the department is working on introduction of innovative methods in medical practice: transcranial doppler, a duplex ultrasound, functional postural-stabilization tests, solid detections and their definition during endovascular invasions, intraoperative micro vascular doppler, brain death diagnosis, management of Increased Intracranial Pressure (ICP) angiospasm monitoring and therapeutic effect control, disorders of the vascular system etc.
